

Quicken 2017 for Mac Release Notes

How to update quicken

1. Select the **Quicken 2017 Menu > Check for updates**
2. If an update is available for your software, you'll be presented with the ability to download and install the update.
3. If you're software is already up-to-date, we'll let you know you're up-to-date and which version you're running.

Version 4.5.6 (6/2017)

- **IMPROVED:** In the loan details screen, added the ability to pay from an investment account.
- **FIXED:** If the category preference was set to short names, fixed an issue where typing a colon to add a sub-category would result in the first sub-category being incorrectly selected.
- **FIXED:** Fixed an issue where quotes would start downloading after clicking Pay Now using Online Bill Pay.
- **FIXED:** Fixed an issue where online bill payments would sometimes be off by a penny due to a rounding error.
- **FIXED:** Fixed an issue where changing the loan Next Payment date wouldn't always update the scheduled transaction date.
- **FIXED:** Refined a data integrity fix that updated old transaction totals to match the sum of their splits correcting a previous bug. In some rare cases, this fix incorrectly changed transaction totals to match an incorrect single split amount resulting in an incorrect account balance. In 4.5.6, the customer will now be notified of any changes and the fix will only change totals for transactions with multiple split lines. Single split lines will have their split amount changed to match the transaction total. In addition, this fix will auto-correct any transactions that may have been negatively altered by the previous update if they have single splits and transfers.
